Note: In 2021 the Beavers Board of Directors approved a restructuring of the Beavers Award categories to reflect changes in present day contractor organizations. The historical Management Award category was renamed the Leadership Award to allow for an award category above the

Supervision Award but not the Leadership Award. The name Management Award was re-purposed to this new award category. To maintain the four award categories, the historical Engineering Award and Service & Supply Award were combined to the new Service & Supply / Engineering Award.
